

HACKER STARTER PACK

Build fast. Break things. Fix them faster.

Sentry helps developers catch errors, trace performance issues, and ship better software — from weekend hackathon projects to production at scale. As a proud sponsor of this hackathon, we're giving you the tools to build like a pro.

YOUR FREE EDUCATION PLAN

50K	5 GB	5M	500
Errors / month	Logs / month	Spans / month	Replays / month
\$20	∞	1 GB	1
Seer AI credits / month	Team members	Attachments	Cron monitor

* Free for 1 year · activate with your .edu email

HOW TO CLAIM

- 0 Sign up with your .edu email
- 1 Head to sentry.io/for/education and sign in or create a Sentry account using your university email address.
- 0 Activate via GitHub Student Developer Pack
- 2 Your .edu email makes you eligible for the GitHub Student Developer Pack — activate that first to unlock your free Sentry education account automatically.
- 0 Add Sentry to your project & start building
- 3 Five lines of code is all it takes. Supports Python, JavaScript, React, Next.js, Node, Go, and more — docs.sentry.io has quickstarts for every stack.

Questions? Come find us at our table. ■

We're at the Sentry table all weekend — whether you're trying to get set up, want advice on your architecture, or just want to talk through an idea, stop by anytime. No question is too small, no idea too weird. We're here for it.

Interested in working at Sentry?

We hire interns and new grad engineers year-round. Come build real things with a team that ships fast.
